### **DETAILED ACTION**

1. This Office action is responsive to the amendment filed on 9/14/2005.
2. The indicated allowability of claims 28 and 30 (original claims) is withdrawn in view of the newly discovered reference(s) to Killen et al. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 29, 44 and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Killen et al (US Patent 6,806,843).

Killen et al disclose, in figures 7, 49c, and 49d, an antenna system comprising an antenna element 72, and a frequency selective surface (FSS) 76. Figures 49c and 49d show the FSS having a plurality of dipole elements 212, and a plurality of switches 216 connected to the dipole elements, see column 18, lines 47-52. Figures 2A-2O also teach the variety of elements of FSS, such as slot elements.

#### ***Allowable Subject Matter***

5. Claims 1,3-12, 14-27, 31-37, 39, 40, 42, 43, 46-49 are allowed.

6. The patent to Wu (6,608,607) is cited as interest showing a frequency selective absorber similar to that disclosed.
